EIF'S NEWEST PUBLICATION
NOW "IN PRESS" is Easter Island Archaeology: Research on Early Rapanui Culture. This volume, edited by Christopher M. Stevenson and William S. Ayres, contains a paper by the late archaeologist, Carlyle S. Smith (The Archaeological Investigations on Easter Island in Historical Perspective); papers on Religious Architecture and Symbol, with contributions by Christopher Stevenson (Excavation of an Easter Island Semi-pyramidal Ahu); Leslie C. Shaw (The 1981 Investigation of an Ahu Poo-poe and Two Avanga on Easter Island); Paul Wallin and Helene Martinsson-Wallin (Ahu and Settlement: Archaeological Excavations at 'Anakena and La Pérouse); Georgia Lee (Rock Art of the Ceremonial Complex at Ahu Ra'ai). The next section on Mortuary Analysis contains papers by George W. Gill (Investigations of the 1981 Easter Island Anthropological Expedition; and Skeletal Remains from Ahu Nau Nau: Land of the Royal Miru); Leslie C. Shaw (Human Burials in the Coastal Caves of Easter Island); Andrea Seelenfreund (Easter Island Burial Practices; and with Simon Holdaway, Color Symbolism in Easter Island Burial Practices); William S. Ayres and Becky Saleeby (Analysis of Cremations from Ahu Ko te Riku); and Vincent H. Stefan (Analysis of Rapanui Cranial Collections...).

The final section, titled Chronology, Artifacts, Flora and Faunal Remains contains papers by Christopher M. Stevenson, José Miguel Ramírez, Sonia Haoa, and Timothy Allen (Archaeological Investigations at 'Anakena Beach and other Near-Coastal Locations); William S. Ayres, Robert L. Spear and Felicia R. Beardsley (Easter Island Obsidian Artifacts: Typology and Use-wear); William S. Ayres, Becky Saleeby, and Candace Levy (Late Prehistoric-Early Historic Easter Island Subsistence Patterns); Christopher M. Stevenson (Estimating Easter Island Obsidian Hydration Rates...); and Catherine Orliac (The Woody Vegetation of Easter Island between the Early 14th and the Mid-17th Centuries AD). This 225 page volume is illustrated with photographs, charts, graphs, line drawings, and maps. Our next issue will have information about ordering a copy of this important collection of papers.

A LOOK BACK IN TIME
RAPANUIPHILE TOM CHRISTOPHER has acquired some old news clippings about Easter Island, and we are delighted to share a few of them with our faithful readers. These are dated 1923, and concern the astonishing news that Easter Island has "sunk into the Pacific".

The Washington (D.C.) Post, for 14 March 1923 features an item, coming by mail from Tahiti and dated there at February 26, that Easter Island was rumored to have sunk as the result of an earthquake in Chile. This was reported by a French captain of a merchant ship who, in trying to verify his position, was unable to find the island. And shortly after the disastrous Chilean earthquake, it was reported by a Santiago newspaper that the wireless station on the island had failed to answer repeated calls (however, there never was a wireless station on the island).

The Washington Star, for the same date, took a bit more of a jaundiced view: "A dispatch from Melbourne, Australia, says
that a wireless message, apparently from a ship, has been picked up there saying that Easter Island has disappeared. Something ought to be done about Easter Island. It is doing some very strange things. On an average of at least once a year it is reported missing. Then somebody goes out to find the spot where it used to be, and lo, there it is, right on its old site, with its great stone images… Now, whether this is a sport of Easter Island or a sport of the newsmongers of the Pacific is not precisely certain. But it is surely confusing the geographers to have these unaccountable “disappearances” coming over the wires from time to time. If Easter Island has a secret means of vanishing for a space there is matter that interests others than the mapmakers. On the other hand, if the “disappearance of Easter Island” is merely a joke…it should be known as a standard jest, so that it need not be taken seriously.

Islands do disappear, but not to bob up again soon after. Surely Easter is no “floating island” that shifts its base and travels around in the currents of the South seas.”

**Surfer Alert! Magazine Review**

*By Mark Blackburn*

As an avid and serious surfer, it was with great delight that I opened the latest issue of *The Surfer’s Journal* (Vol. 9: 1, 2000), to find two remarkable and well-written articles about surfing on Rapa Nui. One, by Sam George, is titled “Rapa Nui: Her Island” and it is a romantic sojourn into a Pierre Loti-like story of ‘Surfing and Finding Love’ on Rapa Nui. After reading this article with its superb photography, I immediately wanted to fly back to Easter Island and head for the island’s various ‘breaks’. In the accompanying article by Max Mills, a more historical approach is provided, including a general history of the island and its people. He puts emphasis on some interesting notes about surfing, such as the fact that a young Chilean surfer, Carlos Lara, is credited with bringing modern surfing to the island in 1987. The first surfing contest was in 1990; the first champion was Pichi Pakariti. Mills also relates how Laird Hamilton and Brock Little were the first truly famous North Shore surfers to put in time and money to explore the rumors about the big waves in the "Hawai‘i of the Southern Hemisphere".
