that a wireless message, apparently from a ship, has been picked up there saying that Easter Island has disappeared. Something ought to be done about Easter Island. It is doing some very strange things. On an average of at least once a year it is reported missing. Then somebody goes out to find the spot where it used to be, and lo, there it is, right on its old site, with its great stone images.... Now, whether this is a sport of Easter Island or a sport of the newsmongers of the Pacific is not precisely certain. But it is surely confusing the geographers to have these unaccountable "disappearances" coming over the wires from time to time. If Easter Island has a secret means of vanishing for a space there is matter that interests others than the mapmakers. On the other hand, if the "disappearance of Easter Island" is merely a joke...it should be known as a standard jest, so that it need not be taken seriously.

Islands do disappear, but not to bob up again soon after.... Surely Easter is no "floating island" that shifts its base and travels around in the currents of the South seas."

## Surfer Alert! Magazine Review

By Mark Blackburn

As an avid and serious surfer, it was with great delight that I opened the latest issue of *The Surfer's Journal* (Vol. 9:1, 2000), to find two remarkable and well-written articles about surfing on Rapa Nui. One, by Sam George, is titled "Rapa Nui: Her Island" and it is a romantic sojourn into a Pierre Loti-like story of 'Surfing and Finding Love' on Rapa Nui. After reading this article with its superb photography, I immediately wanted to fly back to Easter Island and head for the island's various 'breaks'. In the accompanying article by Max Mills, a more historical approach is provided, including a general history of the island and its people. He puts emphasis on some interesting notes about surfing, such as the fact that a young Chilean surfer, Carlos Lara, is credited with bringing modern surfing to the island in 1987. The first surfing contest was in 1990; the first champion was Pichi Pakariti. Mills also relates how Laird Hamilton and Brock Little were the first truly famous North Shore surfers to put in time and money to explore the rumors about the big waves in the "Hawai'i of the Southern Hemisphere".
